

Specification Sheet

- Supra AV6 RGB Scart cable 1m
- 6 cores of 75 ohm tin-plated OFC cable
- Individual tin-plated OFC screens around each core
- PE foam for inner insulation
- RGB wired
- Scart to Scart
- 1 metre length

Supra have produced their own RGB-wired scart to scart cables. These are designed to be used between devices such as DVD, VCR and Set-Top boxes going to TV's, plasma screens and other displays featuring Euro scart sockets:

6 cores of 75 ohm tin-plated OFC cable Individual tin-plated OFC screens around each core

A separate aluminium/polyester shield surrounds all six cores

Very low capacitance, due to the use of PE foam for inner insulation

AV6 RGB is What Hi-Fi "Best Buy" 2002 winner (scart cable category)
AND What Hi-Fi ***** (Apr 2002)

Please note this cable is RGB video only, no sound is carried
