

## Specification Sheet

- Supra AV3 Component to DVI-I Cable 1m e
- 75 ohm tin-plated OFC cable
- PE foam inner insulation
- HD compatible, display 720p and 1080i resolutions
- 1 metre length
- 3 RCA to DVI-I

The award winning AV3 cable provides home cinema users with the ability to use a single jacketed cable to carry RGB or Component Video signals from their DVD players to their TVs, Plasma screens or Projectors.

. Dual insulated 3-core Coax 75 ohm tin-plated OFC cable with individual tin-plated OFC screens around each core and the use of PE foam for inner insulation ensures very low capacitance.

. Metal DVI connector with 0.8 micron thick 24k gold-plated contacts deliver long term reliability. Note that the Supra DVI connectors used are Jenving's own design and are re-wireable and made from die-cast aluminium, which give them good shielding properties

### What HI FI 5 star rated, quote:

"Exemplary colour realism and three-dimensionality"

also " Best Buy " 2002 component video cable under £100 category winner.
