- HDMI.ORG approved
- 720p and 1080i compatible
- Triple-screened OFC cable
- Metal HDMI connectors with 24k gold-plated contacts
- Sky HD and Telewest TVDrive compatible

Another fine example of Supra's commitment to producing high performance superior quality products that offer excellent value for money.

Award winning 1 metre Supra HDMI cable, great quality and high performance make this cable perfect for use with SKY HD, Telewest TV Drive or any other application requiring faithful picture and sound reproduction.

The new "HF100" cable has been purposely designed to run at high resolutions such as 720p and 1080i even over 15 metres (for HDMI<->HDMI).

The HF100 cable design meets (and surpasses) HDMI Compliance Test Specification, revision v1.1 :

Triple-screened, OFC cable

4 screened twisted pairs of solid OFC conductors (with a PE foam insulation layer) improve the High Frequency response for wide-bandwidth and efficient signal transfer

Heavy Double layer shielding (1st layer: Aluminium foil, 2nd layer: Aluminium foil) shield signals from external influences and prevents the digital signal being radiated into nearby components or other cables

Metal HDMI connectors with 0.8 micron thick 24k gold-plated contacts deliver long term reliability

Small form factor cable - diameter only 9.5 mm, enabling cable to be easily hidden

WHAT HI-FI?

Received a 5 star review  in What Hi-Fi's "Ultimate Guide to HD TV (Oct 2005)

Please note that Jenving Technology AB of Sweden, the manufacturers of the Supra HDMI cables, are registered as "HDMI adoptors" with the HDMI Licensing, LLC which is the standards body which promotes the HDMI standard and provides education on the benefits of HDMI to retailers and consumers.

Few other "specialist" cable companies are so licensed, as many buy their cables from third party sources and then pay to have their own branding applied onto some-one else's cables.
